1. CPU speed will be reduced under certain operating conditions. 2. The memory capacity actually available may be smaller than the one displayed depending on the software in use and operating environment. 3. One GB means one billion bytes, and one TB or terabyte means one trillion bytes, when referring to storage capacity. Accessible capacity may vary depending on system configuration and preloaded content. A portion of space is reserved as a recovery area. 4. The communication speed varies depending on the distance between communication devices, existence of obstacles between such devices, the device configuration, the radio conditions, and the software in use. In addition, communications may be cut off depending on the radio conditions. 5. Supplied Battery Life is based on Sony engineering testing. Actual performance may vary considerably based on hardware configuration, software, power management settings, environmental conditions, wireless connectivity and other factors. Maximum battery capacity will normally decrease with time and use. 6. Non-metric weights and measures are approximate and may vary.
